Professional Summary

Self-motivated Python Full Stack Developer with hands-on experience in developing scalable web applications using. Python, Django, JavaScript, HTML5, CSS3, React, Bootstrap, and SQL. Proven ability to complete full development lifecycle projects from design to deployment. Seeking a challenging entry-level role to apply technical skills and contribute to innovative software solutions.

Technical Skills

- **Languages:** Python, JavaScript, HTML5, CSS3
- **Frameworks and Libraries**: Django, React, Bootstrap
- **Database:** SQL, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Vercel
- **Other Skills:** REST APIs, CRUD operations, MVT architecture, JSON, AJAX

Education

BSc Computer Science
Periyar University - Salem, Tamil Nadu
2022 – 2025 , CGPA : 6.5

Projects

1. E-commerce Website | GitHub
Tech Stack: Django full stack
- Built a Django-based static e-commerce application using server-side rendering.
- Implemented login/logout, Product Management, Cart Functionality, and user authentication.
- Designed responsive layouts with CSS Grid and Flex box for seamless experience across devices.
- Used Django ORM for database operations and business logic.

2. Currency Converter | Live Link | GitHub
Tech Stack: HTML5, CSS3, React
- Built a currency converter tool using HTML, CSS, and React, featuring dynamic input handling, API-based exchange rates, and user-friendly interface.
- Implemented state management using React Hooks (useState, useEffect) for efficient data handling and rendering.

3. Movie Website | Live Link | GitHub
Tech Stack: React
- Integrated external movie API to display real-time movie details, posters, and ratings.
- Implemented React Router for seamless page navigation.
- Applied component-based architecture for scalable and maintainable code.
- Implemented state management using React Hooks (useState, useEffect) for efficient data handling and rendering.

Soft Skills

Team Collaboration | Problem Solving | Quick Learner | Time Management
